-------------------------------	-----	-----	-----

GOLD SEAL LAWN GRASS MIXTURE

Per Lb.30	.28	.27½
--------------	-----	-----	------

WESTERN LAWN GRASS SEED

The essentials of a beautiful lawn are: rich, well drained soil; careful preparation of the ground to make it fine, smooth and mellow: sowing at a time when the young plants will have a chance to become well established before they are exposed to the vagaries of our Western climate, that is, dry or cold weather or hot burning sunshine, and last but not least, selection of the proper combination of grasses.

Our **GOLD SEAL LAWN GRASS MIXTURE** is just such a combination. It is a mixture of the purest and cleanest seed of only the highest grade grasses suitable for the purpose of making a beautiful, and lasting lawn. It germinates quickly, roots deeply and withstands the extreme hot weather of summer and the severe cold of winter.

It was developed by us many years ago and the close attention paid to the results obtained permits us to state that it is the leading lawn grass mixture in the west today. This popularity is attested to by the ever-increasing number of customers who will have nothing but **GOLD SEAL LAWN GRASS MIXTURE**.

Hannchen.....	3.35	3.25	3.15
Hanna.....	3.35	3.25	3.15

SEED TREATMENT

SMUT IN BARLEY: For Stripe and Covered Smut add 1 pint Formaldehyde to 30 gallons water (Not Heated). Soak seed for three hours.

For **COVERED SMUT** on **HULLESS BARLEY**, dust with Copper Carbonate, 2 to 4 oz. to bushel of grain.

SMUT IN OATS: For Loose Smut and Covered Smut add 1 pint Formaldehyde to forty (40) gallons of water and sprinkle on 40 bushel grain. Cover with sacks or canvas for two to four hours.

BUNT or STINKING SMUT IN WHEAT: Dust seed grain with Copper Carbonate, 2 to 4 ounces to the bushel, or Copper Carb, using 4 to 6 oz. per bushel. Mix in a barrel mixer so that all grains are covered with the dust. Treatment can be made at any time and grain can be stored without injury.

USE THE YARD STICK

Comparisons of value of almost any products in daily use, can be made by specifications.

There is no reason why any purchaser should not buy seeds on the same basis. Reliable seed sellers, conforming with their own desire and with State Seed Laws, furnish Purity and Germination tests as well as origin of seeds.

In addition to this, we furnish United States Verified Origin Tag Certificates on Alfalfa Seed. State Registration Tags are sealed on every bag of Registered Seed. Guess work may be eliminated by buying seeds of known specifications, furnished by reliable seed dealers, coupled with State Verification Service and United States Verified Origin Service.

Will be glad to give quantity prices:

CUBOR

A Spray Powder containing Rotenone, Penetrant and Spreader.

The most convenient and positive protection against both chewing and sucking insects.

FOUR SIZES: See Catalog Page 70.

SEED POTATOES

When you are ready for them, write and tell us the quantity you will need and the variety you intend using and we will be glad to quote you promptly as prices fluctuate very rapidly.

POTATO SEED TREATMENT

Protect your planting from SCAB, BLACK LEG, BLACK SCURF, DRY ROT. SEMESAN BEL, FORM-ALDEHYDE and CORROSIVE SUBLIMATE are good and will give you the protection desired.

SEMESAN BEL (New Improved)

1 lb. to 7½ gal. Water treats 60 to 80 bushel. Just immerse thoroughly and take potatoes out.

4 Oz. 50c 1 Lb. \$1.75 5 Lbs. \$8.00 25 Lbs. \$31.25

FORMALDEHYDE

Hot treatment—temperature 120 to 125 degrees. 1 pint to 30 gallons of water treats 30 to 50 bushels. Treatment 3-minute immersion: 1 Lb. \$.40: 5 Lbs. \$1.75

CORROSIVE SUBLIMATE (Bichloride of Mercury)

A deadly poison: 4 Oz. to 30 gallons of water treats 8 to 12 bushel: Immerse for 1½ to 2 hours.

¼ Lb. 75c 1 Lb. \$2.75

FIGHT WEEDS

Frequent cultivation will aid in eliminating weeds. Cultivating tends to increase and maintain soil moisture. Weed plants, turned under before they mature seeds, add some humus. Weeds are destroyed by weed-killing compounds such as ATLACIDE CALCIUM CHLORATE:

Weed Killer — ATLACIDE — Weed Killer CALCIUM CHLORATE

Tested by Federal and State Agricultural Experimental Stations for killing noxious weeds.

Atlacide should be applied after the plant is in bloom until the end of the growing season: Atlacide can be dusted on or used in a solution with water. The infested area for treatment should not be cultivated before applying as the entire root system should remain intact for complete destruction. Apply anytime except during a rainfall. Leave the treated area undisturbed until the following Spring. Comes in 200 Lb.; 100 Lb.; 50 Lb.; 15 Lb. drums.

See Catalog Page 70:

Ask For Prices On Larger Quantities

WHAT SHALL BE DONE WITH IDLE ACRES?

The AAA acreage reduction program should suggest an opportunity to build up lean acres and put them in shape to produce more efficiently and economically. There are many plans which may be used that will mature to much benefit.

INCREASE and MAINTAIN FERTILITY

Plant leguminous crops—Clover, Alfalfa, Peas: Yellow Sweet Clover is a good soilage crop and makes good pasture and hay: (See Pages 60 to 63 of Catalog.)

MAKE PERMANENT PASTURES

There are many grasses that can be used for permanent pastures for dry and irrigated sections. Adequate pastures reduce the carrying costs of milk cows and idle stock. (See Pages 60 to 63 of Catalog.)

PLANT TREES

Windbreaks and woodlots are great benefits and conveniences and small orchards of assorted fruit are of untold help: (See Pages 55 to 57 of Catalog.)

PLANT A GARDEN

A good garden can be maintained on a very small space and with fewer acres being tilled more time can be devoted to better gardens: They will help towards reducing expenses: (See Pages 2 to 32 of Catalog.)

NURSERY STOCK FOR THE WEST

Hand in hand with beautiful lawns go shrubbery, trees, bulbs, plants and vines. Be your place large or small, landscaping is essential toward beautifying your surroundings: Our stock is complete with only First Grade items that are particularly adapted for this country: A wide variety is open for your selection and a careful perusal of Pages 47 to 59 of our 1935 Catalog will prove worth your while.

FLOWERS

You can grow from seed to beautify your home.

Pages 34 to 46 of our Gold Seal 1935 Catalog, cover a wide range in flower seeds, from which selection can be made to cover most any type of space, be it a Sunny Spot, Shaded Corner, Damp Spot, Edgings, Backgrounds, Porch and Hanging Baskets, Climbers, Rock Gardens or Cut Flowers: You will have no trouble in making a complete list to cover your needs.

VEGETABLES

Why Not Grow What You Eat?

Over 30 pages, finely illustrated, of every vegetable that is fully adapted to this country: QUALITY is paramount. GOLD SEAL means the Standard of Excellence: You can Buy and Plant GOLD SEAL Seeds with Confidence. Send for our 1935 Catalog. IT'S FREE.
